Strength and Toning Classes

WOD (workout of the day)

This class is taught by highly professional personal trainers. They will correct your technique and make you push yourself more than you thought possible.

Fitness X is constantly varied functional movements performed at relatively high intensity. All Fitness X workouts are based on functional movements, and these movements reflect the best aspects of gymnastics, weightlifting, running, rowing and more. These are the core movements of life. They move the largest loads the longest distances, so they are ideal for maximizing the amount of work done in the shortest time.

WOD technique classes

These are a longer session (45mins) and are not designed as a workout but are specific to work on clients WOD technique in typical exercises used. They are particularly useful if clients are interested in trying our WOD competition.

WOD COMPETITION

This will run on Saturday at 16.00. We will put posters advertising the competition this weekend but the WOD workout will not be available for guests to see till the day before.

Are you old enough?
The classes in which you use extra weight and the HIT Tabata class (High Intensity Training) is minimum age 16 years.

Ab/Core (30min)

This class involves you working your core muscles, designed to create better balance, stability and posture.

Core Training and Core Stability

The area of the body, which is commonly referred to as the core, is your midsection and it involves all your muscles in that area including the front, back and sides. The core includes the transverse abdominis (TVA), erector spinae, obliques and your lower lats.

These muscles work as stabilizers for the entire body. Core training is simply doing specific exercises to develop and strengthen these stabilizer muscles.

A strong core not only gives you a strong base for all other exercise, it helps prevent injury and can give you that much envied sixpack!

Gymnastic Fitness

A class where strength, body control and power are mixed with gymnastic drills. The class is built on progressions and can be attended by people with different skill and strength levels.

A heavy workout that guarantees tired muscles. So if you want to improve your gymnastic elements when doing crossfit – This class is for you!

If you have been doing gymnastics for years and mastered many drills already – this class is for you!

Primal Movement

A healthy body is a strong body where we can use our natural mobility and where strength is found in all types of movement. In this class we challenge our body with the type of movement that it is primarily designed to manage but usually we have lost the skill along the way.

So what types of movement should you be able to do, and what types of movement can you actually do? This class can be a reality check to some and a rude awakening to a few. To others it just starts the desire to keep working and get back to doing all those things that they once could.

We crawl, we squat, we use body weight and we use added weights. The only thing we can say for sure is that we will challenge your (un)natural movement and give you tools for you to improve your mobility further.

Senior Training

A class with focus on stability and strength from slow and controlled movements. We combine a soft cardio workout with core strength and give you lots of inspiration for your own training. This class is a full body class and the movements are adaptable to suit all levels.

Strength and Toning Classes

Body Pump

BODYPUMP™ is the original barbell class that strengthens your entire body. This 60-minute workout challenges all your major muscle groups by using the best weight-room exercises like Squats, Presses, Lifts and Curls. Great music, awesome instructors and your choice of weights inspire you to get the results you came for - and fast!

Body Tone

Body toning concentrates on strengthening all the various muscles of the body which are used for movements of the skeletal system. This helps to improve the shape of the body and improve the tone of the muscles. Improvements in the strength of the muscles make exercise, as well as every day movements, much easier to perform and reduces the risk of injury.

Power Training

Power is a product of both strength and speed. Simply put power training is the KING of fitness. This is a circuit based class with a twist!! You work your way through 8-10 stations, you will find yourself rowing, biking, climbing ropes, flipping tyres and much more.

Functional Training

Functional fitness exercises train your muscles to help you do everyday activities safely and efficiently. In life we push, we pull, we crawl, drag, sit and stand. In functional training we do all that and more, providing you with the muscular strength you need to live your life to the full.

Boot Camp

This class will take you away from MC1 and into the wild! As you make your way around the hotel using the environment as your playground, your final work out will finish at the beach, be prepared to get a little dirty!

Circuit Training

Circuit training is an excellent way to improve mobility, strength and stamina. The circuit training comprises of 6 to 10 strength exercises that are completed one exercise after another. Each exercise is performed for a specified number of repetitions or for a set time before moving on to the next exercise. The exercises within each circuit are separated by a short rest period, and each circuit is separated by a longer rest period.

Fitball

This is a core strengthening program that uses a fitball as an unstable base. It is designed to improve range of motion, strength, stability co-ordination and balance. Fitball provides an excellent workout which will result in a stronger core, improved posture and better body alignment. This class is suitable for all fitness levels and age groups.

Kettlebell

Kettle bell instructions take you through the techniques of how to intergrade kettle bells in different exercises. This includes strength training, dynamic movements and stabilization of core muscles. Kettle bells are more than just weight training and this class will take you through a world of gravity movements where you learn to control it.

Redcord

Redcord suspension exercises are effective and useful for anyone who would like to improve their daily function. The exercises are for rehabilitation, functional activity, injury prevention and performance training. Training with body weight in slings is at the core of the concept. The exercises improve strength, muscular endurance, balance, coordination and core muscle stability. This is what we refer to as functional strength.

SOMA MOVE

SOMA MOVE® is movement and knowledge united – a philosophy, a teaching and a movement form. It is a philosophy because we always ask ourselves, “Why?”. It's a teaching because we teach the answers we get, and it is a movement form because we practice what we preach. SOMA MOVE® is a holistic way to exercise that is athletically and at the same time soft. You work with your body as resistance and with the ground as your tool. The entire session is an uninterrupted flow of movement patterns in which the focus is to work with the body as a unit in harmony with the breathing.

SOMA MOVE® is something that has emerged through a quest to understand the body's functional design and how the design will be used in movement. We have experimented with our own bodies and others to explore how the theory takes shape in practice. Our efforts have given us a clear and effective results as well as the evidence and arguments that constantly move us forward on our quest. SOMA MOVE® is scientifically grounded in all aspects and is no shortcut or simplification.

Athletic improvement

Foot training

A mobility class to increase movement in your joints. This is a class for athletes that want to improve their performance and prevent injuries through increased mobility around joints. It is a slow class that moves from toes to fingers.

Running Classes

30 min Off Road Run

Our 40 minute off road run, is based on being social, meet other people and run as a group in a relaxed but friendly atmosphere. Enjoy the fresh air and beautiful sea views of Fuerteventura and learn about some of the run routes available to you here at Playitas.

The Lighthouse Race

The lighthouse race is a 13.5 km run. The race will start at the roundabout near multi court 2. From there you will run along the red path towards Las Playitas but before you get to the village you will take the 1st left turn. When you make the turn you will be on an asphalt road.

The road will lead you to the top of the lighthouse, it is not a flat route and you will come across some small climbs before the big challenge! At around 5km you will start the climb to the top. You have just over 1km of climbing with parts reaching an incline of 12-15%. When you get to the top you will be greeted by the sports team with a cup of water! From here you make your turn and head back to the resort, you will finish the race in the plaza Rambla. The finish line will be shown to you before the start of the race by the sports team.

5 and 10 km Race

The race will start where we do our morning run taking you down towards the seafront and into the aparthotel. From there you head towards the villas. When you get to the roundabout you will make a left turn onto the red cycle path. You will continue along the red path until the turn point at 2.5km, here you will have an aid station with water. After the turn you make your way back to the start line coming back the same way, when you get to the finish line if you are running 10km you make another loop.

Aquathlon

3.2km Run 200m swim and 3.2km run. The run course is 2 loops of the morning run. On your second loop you will be directed by the sports team towards the swimming pool. When you enter the transition you must let the sports team know your race number this way they can record all your times for the 3 disciplines.

You will swim 200m (4 lengths) you must make sure you wear a swim hat. After you swim you will exit the transition from the same place you went in again shouting your race number to the sports team to record your split time. You will then head back out onto the run course for another 2 loops of the morning run course. The finish line is in the same place as the start line.
